Fiserv India Achieves Highest Level on CMMI for Development

Brookfield, Wis., February 9, 2010 – Fiserv, Inc. (NASDAQ: FISV), the leading global provider of financial services technology solutions, today announced that its Indian subsidiary, Fiserv India, has successfully completed a Maturity Level 5 appraisal against the Capability Maturity Model Integration (CMMI) for Development.

CMMI Level 5 is the highest level on process maturity scale, as defined by the Software Engineering Institute, Carnegie Mellon University. It indicates institutionalization of continuous process improvement in the organization, using quantitative techniques and innovative practices. This has placed Fiserv India among the top eight percent of organizations worldwide that have been appraised against the CMMI v. 1.2.

The appraisal was carried out by an independent team of appraisers led by Gururaj Managuli, High Maturity Lead Appraiser from QAI India in November 2009. “Fiserv India showed a great deal of discipline in both implementation of the processes and preparation for the appraisal,” said Gururaj Managuli.

Shrihari Gokhale, president, Fiserv India reiterated the importance of process and quality as a cornerstone of the delivery capability of the organization. He remarked, “Fiserv India undertook the CMMI appraisal because continuous process improvement inevitably leads to the highest quality of products and deliverables for our clients, and delivery within committed timelines and budgets. This is a significant milestone for Fiserv and our journey on this path will continue.”
